Demographic

♀ Female _____ 22 _____ years

📍 _____

Single _____

Construction _____

Motivations

- Wants to learn the language
- Wants innovative approaches
- Wants to try new technologies

Frustrations

- Hard time with written alphabet
- Learning at school is very boring
- Not enough exciting and innovative approaches in education

TARGET: INSEGNANTI FP E INSEGNANTI DI LINGUE

NAME

Søren

TYPE

Rational

Goals

- Teach students in an innovative way
- Wants to help his students with real-life experiences

Quote

“
I used to be a construction worker myself. When I retired, my former employer suggested I pass down my knowledge..”

Background

Søren is a former construction worker. When he got older and decided that he wants to pass his knowledge he got a PhD and became a VET teacher. His son's wife is from Bulgaria and he has enjoyed learning about other countries, therefore he specialises in language learning for immigrants.

Demographic

♂ Male years

📍 Denmark

Married

Vet teacher

Motivations

- Wants to teach the language
- Wants innovative approaches
- Wants to try new technologies

Frustrations

- Hard time with old school materials
- Teaching in the old school style is boring
- Not enough exciting and innovative approaches in education

NAME

Aurélie

TYPE

Rational

Goals

- Teach students in an innovative way
- Wants to help his students with real-life experiences

Quote

“
I have always been good with languages and I enjoyed explaining the materials for my fellow students.”

Background

Section: Jobsamtale / Jobinterview (ENGL.)

Your application/cover letter

The primary purpose of your job application is to make the employer want to meet you for a job interview. An application/cover letter is often just as important as a CV in Denmark when you apply for a job. It is important to write an application/cover letter specifically tailored for each position you apply for. This video explains how to write a good application/cover letter that catch the attention of Danish employers.

How to write an application/cover letter

Here are five guidelines on how to make your job application stand out from the crowd:

- Explain what you have to offer: See things from the employer's perspective. Focus on what you can offer. Get to know your competences, also the ones which you have not been aware of in the past, and especially the ones which may be more special in Denmark than in your home country (e.g. your language skills). Besides your professional competences, such as technical or economic skills, be sure to include your social competences, such as negotiation or teaching skills, and last but not least your personal competences which round up your profile. In Denmark it is essential to show a complete picture of yourself: an employer will be interested not only in your diplomas, but also in your personality and your interests. In short: what drives and motivates you.
- Address the criteria in the job ad: Describe how you fulfil the criteria specified in the ad. Be specific when you translate your experiences and personal qualities to match the job criteria.
- Find a suitable style: Write your application in a style that matches the type of company you are addressing. For instance, your style will be more informal and creative when applying for a job at an advertising agency than a financial institution.
- Write with clarity and precision: Avoid long and complex sentences. Use shorter paragraphs and break up your application in sections. An application should be no longer than one A4 page.
- Avoid mistakes: Always check your application for language errors - particularly if you are not writing in your mother tongue. If possible, get
